FEATURES & BENEFITS

- Adjustable centrifugal force from the vibrator unit optimises performance with different concrete slumps and beam lengths. This ensures effective compaction and finishing.
- In-line flex. drive shaft for durability & reliability.
- High power 4 stroke Honda engine for high performance and reliability.
- Height adj. handles for operator comfort & control.
- Isolators ensure vibration is transmitted to the concrete and not the operator.
- Tool-free Quick Clamp enables quick & easy removal of the beam for transport & storage.
- Double-sided beam profile with one side designed for form free screeding and the other for striking off between form work.
- Heavily reinforced beam for ultimate strength and vibration transmission.
- Different beam lengths available from 1.5m to 6m.
